

The areas of Upstate South Carolina, (such as Greenville, Spartanburg, Anderson, Greenwood, Clemson and Easley, among others) and Western North Carolina (Asheville, Hendersonville, etc) are beautiful places to have a wedding year round. At AVF Wedding Videography, we have produced hundreds of wedding videos shot at both indoor and outdoor locations in these areas, as well as have covered weddings all over the world (We enjoy filming destination weddings).

### **Are you asking yourself "Why should you have a professional wedding video?"**

A **professionally produced wedding video** captures your wedding memories like no other medium. A wedding video not only captures the events that you are a part of, but also those that you will miss, such as your family and friends arriving to the wedding, your spouse-to-be nervously awaiting their chance to say "I Do" ([like in these preceremony videos](#)), and many other moments that happen while you are waiting to walk down the aisle. What is the groom saying to his friends? What do the musicians sound like? A wedding video captures those moments and many others so that long after your wedding day, you can experience, enjoy, and share them.

**Professional Video Services** are irreplaceable when it comes to capturing a life moment like a wedding. "Uncle Bob's" new video camera might be great for family vacations, but when it comes to a wedding, **high-quality professional equipment** with the capability to work in low light (it gets REALLY dark at some receptions), and a staff of **experienced professionals** to make sure all of the settings are correct, have the ability to use that equipment, and are able to anticipate action and track it as it happens with a steady hand to avoid shaky camera shots, bad angles, and shots of feet, ceilings, and backs.

Fortunately, **AVF Wedding and Event Videography** uses professional equipment (including High Definition Cameras, if desired), and our experienced staff of videographers know how to use it from years of formal training, filming [hundreds of weddings](#) , covering hundreds of live events ( *including professional cycling events - do you know how fast those guys go and how unpredictable their movements are - especially when you are filming from a moving vehicle?* ), as well as producing dozens of broadcast television programs (including several national award winners).

**High Quality Audio** is as important as the imagery of the video. Wireless microphones capture

all the important audio in crystal clear clarity, from the vows to the whispers while lighting the unity candle. Ever been to a wedding where you can't hear the bride and groom? Surprising enough, that's pretty much how it is at *EVERY* wedding. By placing a wireless mic on both the Groom and the Officiant, you'll be able to enjoy every word (Check Out examples [HERE](#) )

**Now you may be thinking "Wow, that sounds like it may be expensive. Can I afford a wedding video?"**

Let's face it. The average wedding budget shrank by almost 12% in 2009. Wedding videography is not always at the top of the wedding budget checklist, and often is the place that gets looked at closest to be cut. Besides your marriage license, your photos, your rings, a dried up piece of cake, and a wedding video, what else will you have to remember your wedding by 20 years from now? The flowers? Maybe the shrimp cocktail at the reception? Unfortunately, those won't hold up too well over time. So video is an extremely important element that should be looked at closely.

That's why **Affordability** is extremely important. Short of buying a new home or sending a child to college, your wedding is one of the most expensive financial outlays you face in your lifetime. And every service provider wants their money at the same time. Realizing this,

**AVF Weddings has found a way to help**

. When you hire AVF,

**50% of the cost of the package that you choose reserves your date**

. But then you can

**delay your final payment for up to 1 year from the date of your wedding**

with no extra costs. After your wedding, we will provide you with the raw footage of your wedding on DVD, and then when you are ready to receive your edited copies, you pay the remaining balance at that point. The AVF Wedding Videography editing artists then will begin work turning the raw footage into your entertainment on your anniversary for the next 50+ years! And if at any point you decide that you would not like to have your video edited, just let us know, we'll waive the remaining balance and forward you the original tapes of your wedding so that you can do as you wish with them, with no penalties or additional fees.

[Check out our pricing plans](#)

and see if they might fit into your plans. Remember, you only have to pay 1/2 of the prices listed on packages to have professionally shot video of your wedding!

**So why should you hire AVF Wedding Videography for your wedding video?**

**Quality and Professionalism** are the most common items mentioned in feedback from our customers. Maybe it's because of the years of experience we have filming weddings, other live events, and corporate productions. Maybe it's because we enjoy what we do, so that passion translates into the videos we produce for the couples taht invite us into their lives and trust us with capturing their milestone of marriage. Or maybe it's the excitement of being a part of a real reality program. real life, with real emotions, that inspire us to ensure that the memories are captured and pieced together in such a wa y as to tell a story - not just be footage.
